DETAILED ACTION

1. This Office action is responsive to applicant's response to the election of species requirement received November 14, 2006.
2. Applicant elected in terms of formula (1) the variables where L is acetylacetonate, M is Ir, N^f is sufficient to form with N the group:

R¹ and R² are such as to join to form a phenyl ring and m is 2 and w is 1. The election of species requirement is withdrawn and all species have been considered.

Claim Objections

3. Claims 3, 4, 31 and 32 are objected to because of the following informalities:

In claims 3 and 4, it is suggested that "diazole compound" be changed to "diazole group ligand" for consistency with claim 1 terminology and for further clarity.

In claims 31 and 32, it is suggested that "OLED device" be changed to "electroluminescent device" for consistency with claim 1.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
5. Claims 19 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1774

Claim 19 recites a formula that does not have a "bridgehead nitrogen" at the junction with the aromatic group as required by parent claim 1. The formula of claim 19 is outside the scope of the light emitting material set forth in the parent claim and accordingly, claim 19 is considered to be indefinite.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-33 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-31 of copending Application No.

10/729,402. Although the conflicting claims are not identical, they are not patentably distinct from each other because the formulas set forth in '402 are within the scope of the complex shown in claim 19 of the pending application. The compounds of the present application require diazoles fused with at least one aromatic group and '402 require pyrazoles, which are diazoles, fused with at least one aromatic group. The compounds comprising pyrazole ring containing

Art Unit: 1774

compounds of '402 encompass some of the diazole ring containing compounds of the present application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
